

Productspecification: Smoked cherrywood barley malt

Selected local summer malting barley is used to produce cherrywood smoked malt. After six days of gentle germination in the germination box, it undergoes high modification. Kilned and smoked over fresh smoke from pure cherrywood, it develops a pleasant, intense, and spicy aroma.

<i>Parameter</i>	<i>Minimum</i>	<i>Maximum</i>	<i>Unit</i>
Water content		6,0	%
Fine grist in dry matter	80,5		%
Wort colour	3,0	4,5	EBC
Friability	80,0		%
